## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-4, 9, 10, 21-31, 37, 38, 41, 42, 45, and 47-49, drawn to a printhead assembly for a printer which prints onto a moving web that follows a path, classified in class 347, subclass 42.
  - II. Claims 5 and 10, drawn to an air supply to prevent media from sticking to the printhead, classified in class 347, subclass 67.
  - III. Claims 6 and 7, drawn to a capping device, classified in class 347, subclass 29.
  - IV. Claim 8, drawn to a rail adjustor, classified in class 347, subclass 8.
  - V. Claim 11, drawn to a pre-heater, classified in class 347, subclass 102.
  - VI. Claims 12-20, 36, and 43, drawn to a dryer, classified in class 347, subclass 102.
  - VII. Claims 32 and 44, drawn to a supply canister, classified in class 347, subclass 2.
  - VIII. Claims 33 and 46, drawn to a tote, classified in class 224.
  - IX. Claim 34, drawn to a cutting mechanism, classified in class 347, subclass 101.
  - X. Claim 35, drawn to a slitter, classified in class 234, subclass 35.
  - XI. Claims 39 and 40, drawn to a business method, classified in class 705.

Art Unit: 2861

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II-XI are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the subcombinations are simply additional features not necessary to print onto a moving web that follows a path. The subcombination has separate utility such as those discussed below.

The inventions are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case:

Subcombination II has separate utility such as a device for preventing print media from sticking to a printhead.

Subcombination III has separate utility such as a device for capping a printhead.

Subcombination IV has separate utility such as a device for adjusting a rail.

Subcombination V has separate utility such as a device to pre-heat print media.

Subcombination VI has separate utility such as a device for drying print media, etc.

See MPEP § 806.05(d).

Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian Goldberg whose telephone number is 571-272-2728. The examiner can normally be reached on Monday through Friday, 9AM-5PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen Meier can be reached on 571-272-2149. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
